March 2022

Timber-based fire doors: Practical Installation Assessment.

Thank you for your enquiry about our training package, here's a little bit more information about the training we provide.

Aims and objectives.

We have designed the Practical Fire Door Installation assessment for those that have already passed the theory-based training so that they have the opportunity to prove that they understand the full installation requirements and can install a fire door assembly compliant to the relevant Standard.

Delivery.

The assessment can be done at our training centre or at your own venue provided that safe working conditions are provided for the installer and for the assessor.

The candidate would be required to install a set of timber-based FD30(s) double-leaf fire doors. We would provide all components and materials including the door frame, door leaves, hinges, lock, self-closer, bolts, door furniture, signs, fire seals, smoke seals, threshold plate, timber packers and fire stopping materials. Candidates are required to provide their own tools, fixings and (plastic) packers.

A full day is allowed for this assessment and the outcome is dependent on the candidate producing a fully compliant installed fire door assembly within the time allowed, which is seven hours. The assessor making the final decision would be a professional fire door inspector.

Successful candidates would receive a further certificate and can be listed as qualified fire door installers at our website.

Prices.

Prices below are quoted excluding VAT. There is a sliding scale so that applications for multiple delegates receive a useful discount.

Training Course	One person	Two persons	Three persons	Four persons	Five persons
BWF Fire Door Installation Awareness two-day course	£850 each	£750 each	£700 each	£650 each	£600 each
Timber fire doors: Installation course	£400 each	£350 each	£300 each	£275 each	£250 each
Timber fire doors: Maintenance course	£400 each	£350 each	£300 each	£275 each	£250 each
Timber fire doors: Inspection course*	£1000 each	£900 each	N/A	N/A	N/A
Practical assessment (for installation/maintenance courses)	£1000 each	N/A	N/A	N/A	N/A

*This course includes the practical training element and the final assessment as standard.

~~NB: The theory element for all courses, except for the BWF course, can be studied remotely at home or at our training course.~~

How to book.

Contact us by telephone on 07970 201231 or by email at neil@firedoorscomplete.com alternatively there is a contact page at our website www.firedoorscomplete.com where you can make an enquiry or send a message

Assessor's credentials

The assessment has been designed by myself and is based upon my forty plus years of industry experience as well holding the following qualifications:

- Certification to a UKAS accredited fire door inspection scheme
- Professional fire door inspector
- **Chairman of the Affiliation of Fire Door Inspectors**
- Fire door inspector certification by BRE Global and Doorcheck
- Fire door installation & maintenance certification by BRE Global
- FDIS Diploma in fire doors
- Fire stopping inspector certification by Independent Fire Inspections
- Membership of the Institute of Fire Engineers
- NOCN approval for delivery of SightRight assured courses (contact us for details)
- ~~Courses have FireQual recognised training programme approvals.~~

Note.

Whilst there is currently no legal requirement for fire door installers to possess a dedicated qualification, competence is necessary. The Regulatory Reform (Fire Safety) Order 2005 requires those that provide fire safety related services to be 'Competent Persons'. Approved Document 7 of the Building Regulations covers workmanship and materials. Subsequent to the Hackitt Report there are industry led working groups looking at what competence should look like in the future and you may find the report 'Setting the Bar' interesting at <https://cic.org.uk/setting-the-bar-annexes.php>

However, there is currently no mandatory requirement for fire door installer training but many clients such as housing associations, healthcare organisations and education providers now require that those that install or maintain fire doors have a qualification or certification as proof of competence to perform those works.

~~In terms of third party approval for our training courses, we have attained FIREQUAL 'Recognised Programme Approval'. More information is available at <https://www.firequal.com/qualifications/fire-doors-complete-ltd>~~

We hope you have found the above interesting and please don't hesitate to contact us with any questions.

Yours faithfully,

Neil Ashdown
